

Voster ATS Team is a professional cycling group racing with the UCI Continental Team license. The team consists of ten riders belonging to the leading Polish road cyclists, bronze medalist of the Polish championship - Paweł Franczak or the best mountaineer of Tour de Pologne - Patryk Stosz. The team competes in road races throughout Poland and Europe, representing the colours of the Voster company everywhere.

## COLLECTION

COLOR IS THE MOST EXCITING OF ALL NATURAL MATTER ON EARTH. IT EXERTS IMPRESSION ON EACH OF US, EVOKES EMOTIONS, HELPS TO TURN HOME INTO A BEAUTIFUL AND FASCINATING PLACE TO LIVE. IT WOULD BE HARD TO IMAGINE LIFE AND THE WORLD WITHOUT COLOUR.

IT IS THE POWER OF COLOURS THAT INSPIRED US TO CREATE THE COLOURS COLLECTION.

COLOURS PLAY A VERY SIGNIFICANT ROLE, THEY ARE INTEGRAL PART OF EVERY AREA OF OUR LIVES. OUR COLLECTION WILL ALLOW YOU TO BRING COLOURS INTO YOUR WORLD.

# DOOR FRAME TO SYSTEM SARA PRO

DOOR FRAME

**Sara Pro** door frame is dedicated to full plain door wings.

The Sara Pro hidden door frame is a unique and durable solution for those looking for new trends in interior design. High-class aluminum, a rigid structure and an improved assembly system make this solution popular, gaining new followers.

**Sara PRO is one module-profile, separate for the external and internal system.** Sara Pro fits perfectly into minimalist rooms and fits in with the current trends.

Door wing:

- Non-rebated door wing
- 2 3D hidden hinges
- magnetic lock for key, cylinder or bathroom lock
- standard rim

3D hidden hinge

Magnetic lock  
– silent closing

A door wing aligned with wall creates a uniform aesthetic surface

SINGLE CONCEALED DOOR FRAME SARA PRO INTERIOR, EXTERIOR TO WIDTH: 60 – 90, TWO 3D HINGES: ALUMINIUM OR ANODE, PAINTED WHITE

PRESENTED DECOR: GREY

A new version of non-rebated doors. Through the use of an innovative opening and closing system, we have obtained a minimalist and modern form of doors that do not have a traditional lock and handle.

The wing has a block of magnetic stainless steel in the frame and a system of strong magnets. The magnetic force causes the door to close silently and perfectly.

In order to fully close (lock) the door, a small lock with a toilet block or a cylinder lock should be used as an option at an additional cost.

The wing is enhanced with solid board

magnet system – door wing, door frame

# VARNISHED

REBATED  
DOOR WING

120

The door designed as part of the project entitled Modified panel doors of the standard segment for today, tomorrow, the day after tomorrow and for many years under the Smart Growth Operational Program 2014-2020, Sub-measure 3.2.1 Research for the market. The structure of the product is a consequence of the implementation of the results of R&D works in the field of joinery production technology in the form of internal panel doors (standard segment) with significantly increased strength'.

# SINGLE FRAMELESS CASSETTE

SLIDING SYSTEM

122

The frameless cassette is a sliding system of doors hidden in the wall without the use of a masking band for a gypsum board wall. The frames remain concealed.

The original form gives the arrangement a very modern, slightly austere character. This solution allows for a modern and simple arrangement of rooms.

Door wing:

- Non-rebated sliding door wing
- Installed PVC door holder of wing colour

Additionally charged options:

- Steel round holder
- Steel oval holder

Steel round holder  
colour: silver, graphite

Steel oval holder  
colour: silver, graphite

SINGLE FRAMELESS CASSETTE	
FRAMED DOOR WINGS	Prices according to the catalogue offer + additional charge page 14 – 97
FULL PANEL PLAIN DOOR WINGS	● Finish Foil, ● CPL, ● PP Platinum
FULL PLAIN VARNISHED DOOR WINGS	Available decors page 120 ● HDF

Non-rebated sliding door wings exclude ventilation cut. Instead ventilation sleeves can be applied.

Non-rebated varnished door wings with non-soft edge (slight colour difference may occur).

# SINGLE ON-WALL SYSTEM

SLIDING SYSTEM

This solution allows for an easy and simple way of installing the rail and the door wing without disrupting the existing wall. Door wing slides along the wall on the rail mounted above the door opening or to the lintel. The system includes: aluminium rail 200 cm long (SN 200/100 kg), carriages, mounting elements and the masking band (curtain rail). It is possible to make a single on-wall sliding system with curtain rail of length 150 cm. Sliding system (aluminium rail + masking trim, length 200 or 150 cm, for door wings 100 cm wide a system 220 cm long is recommended: ● FF ● 3D ● CPL ● PP

#### Door wing:

- Non-rebated sliding door wing
- Installed PVC door holder of wing colour

#### Additional charges:

- Adjustable tunnel frame
- Fender beam: ● FF ● 3D ● CPL ● PP
- Steel round holder
- Steel oval holder\*
- Hook lock
- Door closer

FRAMED DOOR WINGS	Prices according to the catalogue offer + additional charge page 14 – 97
FULL PANEL PLAIN DOOR WINGS	● Finish Foil, ● CPL, ● PP Platinum
FULL PLAIN VARNISHED DOOR WINGS	Available decors page 120 ● HDF
GALZED PLAIN VARNISHED DOOR WINGS	Prices according to the catalogue offer + additional charge page 121

Non-rebated painted door wing made with the edge in non-soft technology (slight colour difference might occur).

Non-rebated door wings do not feature ventilation cut. Ventilation sleeves can be provided.

\* oval holder does not feature installing hook lock

**DOOR CLOSER** - slows the movement of the door wing in the final phase of its closing, aligning it gently into the frame. Increases doors use safety and prevents the wing from bumping onto the door frame.

For interior doors, excluding glass doors.

**MASKING TRIM (CURTAIN RAIL)**

**TUNNEL MOUNTING**

**FENDER BEAM**

**WITHOUT MOUNTING**

# DOUBLE ON-WALL SYSTEM

SLIDING SYSTEM

This solution allows for an easy and simple way of installing the rails and the door wings without disrupting the existing wall. Door wings slide along the wall on the rails mounted above the door opening or to the lintel. Standard system set includes: aluminium rail 2x length 200 cm long (SN 200/100 kg), carriages, mounting elements and the two-element masking band (curtain rail). It is possible to make a double on-wall sliding system with aluminium rail of length 2 x 150 cm.

Double sliding system (2x aluminium rail + two-element masking trim): ● FF ● 3D ● CPL ● PP

Door wing:

- Non-rebated sliding door wing
- Installed PVC door holder of wing colour

Additional charges:

- Adjustable tunnel frame
- Steel round holder
- Steel oval holder\*
- Hook lock
- Door closer
- Synch to double system

FRAMED DOOR WINGS	Prices according to the catalogue offer + additional charge page 14 – 97
FULL PANEL PLAIN DOOR WINGS	● Finish Foil, ● CPL, ● PP Platinum
FULL PLAIN VARNISHED DOOR WINGS	Available decors page 120 ● HDF
GALZED PLAIN VARNISHED DOOR WINGS	Prices according to the catalogue offer + additional charge page 121

Non-rebated varnished door wings are made in non-soft technology (a slight colour difference may occur). Non-rebated door wings do not feature ventilation cut. Ventilation sleeves can be provided. Models: Tango, Antares - glass panel application in the left wing does not constitute a reflection in the right wing.

If hook lock is ordered to double sliding door wing, the other door wing must feature a steel holder and hook lock plate.

Steel round holder  
colour: silver, graphite

Steel oval holder  
colour: silver, graphite

Hook lock  
+ rosette

\* oval holder does not feature installing hook lock

## SYNCH TO DOUBLE SYSTEM

Synch system synchronises the movement of door wings in double door system; moving one wing causes analogous movement of the other wing.

For interior doors, excluding glass doors.

MASKING TRIM (CURTAIN RAIL)

## TUNNEL MOUNTING

## WITHOUT MOUNTING

# SYSTEM LOFT GLASS

NEW

SLIDING  
SYSTEM

TRANSPARENT GLASS GRAPHITE 80, 90

TRANSPARENT GLASS WHITE 80, 90

**LOFT PURE GLASS** system that combines a high level of aesthetics and functionality, intended for glass sliding doors, interior.

The use of the **LOFT PURE GLASS** system will not only visually enlarge space, but also emphasise the unique, modern and elegant character of the interior, full of sunlight and space.

**Advantages of the system:**

- the possibility of using a glass pane in various finishes, thanks to which we can emphasise the individual character of the room, its discreet separation or integration with the entire interior design
- the system provides illumination of the space and its optical enlargement
- colour of fittings in line with the latest interior decoration trends
- the use of the Loft Pure Glass system gives the interior lightness, elegance and a modern character

**Max. door weight 70 kg**

HOLDER

# SYSTEM LOFT LINE

SLIDING  
SYSTEM

The collections of LOFT LINE systems are the systems inspired by the loft aesthetics - vintage. The visible mechanical elements of the system together with dark lacquer coating add the interior unique character. The system does not feature Windsor and Mono door wings.

#### Advantages of the system:

- Silent and smooth rail thanks to bearing rolls
- Easy mounting, door wing can be fixed in desired position
- Lacquer coating on the rail and all system elements is characterised by high resistance to mechanical impact, and also it prevents from dust accumulation.

#### Accessories charged additionally:

- **Door closer**
- **Mortise door wing holder**
- **External holder**
- **On-wall bottom rail**, assembly does not require to make drills in the floor
- **Wall clamp** to loft line double system mount
- **Rail clamp**

# ALUMINIUM ON-WALL SLIDING SYSTEM

SLIDING  
SYSTEM

136

## Single aluminium on-wall sliding system

The system does not feature Windsor and Mono door wings.

### Description:

System dedicated to interior doors, combining elegant design, smooth lines with strong rigid rail guide construction and unique six hardware. The rail is made of high quality anode aluminium.

### It features:

- Drilled mounting holes
- Construction enhancement to provide stability and muting system operation
- 'Click' system that enables fast and easy masking trim mounting as well as on-wall profile directly to the rail
- Simple and intuitive mounting system

**Maximum working load 100 kg per one door wing**

### Additional charges:

- Anti-dust brush that can be used to conceal the distance between the top door wing edge and the masking trim. Brush is available in two colours - white or grey.

GUIDING RAIL

# SLIDING SYSTEM MAGIC

NEW

SLIDING  
SYSTEM

138

## System MAGIC with concealed rail

System is available only with panel in non-rebated form MAGIC type.

The Magic sliding system includes a micrometrical adjustment system that allows vertical and horizontal adjustment to compensate for any wall unevenness. These operations are possible without removing the wing from the carriage.

To improve smoothness of movement, the system is equipped with a metal bottom rail.

The guide profile at the bottom of the wing reduces the noise level when the door is sliding.

## ELECTRIC STRIKE

Available types of electric strikes 12 V:

- 410-12AC/DC (closed, supplying power causes opening)
- 1411-12DC (open, supplying power causes closing)
- 1420-12AC/DC (with the switch, closed, supplying power causes opening, can be switched off manually by moving the lock latch)

Electric strike is available to following door frames:

- Electric strike is available to following door frames:  
page. 142-143
- adjustable standard page 144-145
- fixed page 147

## AUTOMATIC THRESHOLD

Door wing without automatic threshold

Door wing with automatic threshold

- Mounted on the bottom part of door wing
- Automatic, gradual descending with closing the wing
- Increased soundproofing
- Exact, fixed seal press that eliminates the need for standard threshold
- Simple regulation of press power

AUTOMATIC THRESHOLD – FEATURES FRAMED AND PANEL DOOR WINGS (ENHANCED WITH SOLID BOARD)

# TECHNICAL INFORMATION

## REBATED SINGLE DOOR WINGS

All Voster rebated door wings match door frames accordant to Polish building norms

- Standard width of door wings: 60, 70, 80, 90.
- Width 100 – framed door wings (does not feature wings: Kubus, Lupus, Incanto, Prado, Mediolan, Bornos): additional charge
- Width 100 – panel door wing additional charge
- Lock has one turn-key option
- Due to the fact that the decorative foil with which our products are glued imitates the grain of the wood, which does not have the same grain pattern and the same colour throughout the length and width of the tree, the decorative foil in the longitudinal and transverse direction does not have the same colours and grains.
- Panel wings (honeycomb), width 100 and wings enhanced with a solid board, width 60 - 100, are equipped with three hinges as standard.

POLISH NORM

CZECH NORM

## SINGLE NON-REBATED DOOR WINGS

- Standard width of door wings: 60, 70, 80, 90.
- Width 100 – non-rebated framed door wings: additional charge. Does not feature wings: MEDIOLAN and LOFT.
- Width 100 – panel door wing additional charge
- Due to the fact that the decorative foil with which our products are glued imitates the grain of the wood, which does not have the same grain pattern and the same colour throughout the length and width of the tree, the decorative foil in the longitudinal and transverse direction does not have the same colours and grains.
- Between ABS rim and the wing surface a slight difference in colour and structure might appear.

POLISH NORM

CZECH NORM

## FRAMED DOOR WINGS ● FRAMED DOOR WINGS PLATINIUM COLLECTION

- solid construction
- 3 pintle hinges
- 3 regulated pintle hinges – PLATINIUM COLLECTION
- Innovative way of rail veneering: rimless
- Rail of coniferous wood – PLATINIUM COLLECTION
- Rigid, stable construction
- High endurance to mechanical impact
- No glazing beads
- Tempered glass
- Smooth side of the glass is on the wider side of the door wing.
- Glass can be fixed reversely - no additional charge.
- Lock has one turn-key option
- Possibility to independently cut the framed door wings up to 4 cm in the Polish norm and 3 cm in the Czech norm without losing the warranty - does not feature sliding door wings and double doors.

- The manufacturer reserves the possibility of differences in the translucency and coloration of the panes made in screen printing technology, compared to the panes installed in the exhibition wings or in the earlier production runs of the door wings.
- Door wing can be made without a drill for key (economy lock) – no additional charge.
- Central elements of door wings MOBI, GRAFO, DUO can be made both of solid MDF board or cell board which results in the weight of a door wing. However it does not affect quality and endurance of the product.

## REBATED DOOR WING IN CZECH NORM

Height of bottom rail in Czech norm:  
 door wing DUO: 359 mm (406 mm PL),  
 rebated door wing MOBI: 342 mm (389 mm pl),  
 door wings: VINCI, BELLO, MEDIOLAN, BORNOS:  
 133 mm (180 mm pl).  
 Non-rebated door wings in Czech norm –  
 bottom rail with cut 47 mm.  
 Door wings: LOFT, KUBUS, MONO, WINDOOR  
 (IV, SPHAGETTI), PLATO – not available in Czech  
 norm.

# TECHNICAL INFORMATION

## FRAMED DOOR WINGS

Internal section

Solid – massive FRAMED construction (no honeycomb core filling)

## VENTILATION SOLUTIONS

Ventilation cut

20

Ventilation sleeves:

- door wing width 60, 70 – 4 pcs.

90

Ventilation sleeves:

- door wing width 80, 90 – 5 pcs.

Grilled PVC ventilation sleeve – Ø 47 mm.

Brass ventilation sleeve – Ø 40 mm.

VENTILATION CUT OF DOOR WING MODERNO

Rail of coniferous wood features PLATINIUM COLLECTION and non-rebate LOFT COLLECTION

## NON-REBATED SLIDING DOOR WING

right sliding door

left sliding door

sliding door wings – veneering rails 360°

invisible rim

### Options of door wing stabilising filling

Honeycomb core – standard

Enhancement – solid board – additionally charged

### Construction of panel door wing
